SUMMARY

Marketing and communications professional with 7 years at Corning Optical Communications and, since July 2025, the person running marketing at Controlify, a software solutions agency with its own SaaS products. I build brands end to end: visual identity, websites, paid campaigns, sales collateral, educational content and AI-assisted video production. I bring the rigor of corporate communications at a global company together with product thinking and hands-on execution, from strategy and scripting to the final cut, launch and performance tracking.

CORE SKILLS

Brand strategy & positioning · SaaS marketing · Creative direction · Meta Ads & lead generation · Sales funnels & consultative selling (AI bots and agents, demos, closing) · Video production & editing · AI image and video generation · Prompt engineering (JSON prompts, custom bots) · Website & landing page development · Social media management · Customer education & onboarding content · Product storytelling · Corporate & internal communications · Graphic design & visual systems

EXPERIENCE

Controlify

Reynosa, Mexico · Jul 2025 – Present

Marketing & Creative Lead

Software solutions agency with its own products (Controlify, ReclutaYa, Controlify Finanzas, iCross) and client projects. Sole owner of the marketing function.

- Designed, wrote and shipped the Controlify landing page (controlifyapp.com) and the Controlify Solutions agency site, covering product modules, pricing, testimonials, the product portfolio and client work.
- Built Controlify's visual identity: logo, a 14-icon module system, brand mascot, per-module product animations and AI-generated photography for each frontline role.
- Planned and ran Meta Ads campaigns for Controlify and ReclutaYa. From September to October 2026 they generated 223 form leads and 2,100+ ReclutaYa landing page visits at MXN 0.55–1.21 per visit.
- Built and run the full sales funnel: from Meta ads to AI bots and agents on WhatsApp and web that answer 24/7, qualify leads and book demos, through to consultative selling I do personally (video-call demos, follow-up and closing with businesses and restaurants).
- Produced 30+ ad and product videos — showcases, B2B spots, 9:16 vertical ads, UGC series with AI-generated talent and a per-module "Solution" series — using Grok, Kling AI, Higgsfield, Premiere Pro and After Effects.
- Created Controlify Academy: 40+ video tutorials on checklists, training, payroll, audits, permissions and check-in for customer onboarding.
- Launched the ReclutaYa brand, an AI recruiting platform: brand book, kick-off video, product showcases and acquisition campaigns across web and WhatsApp.
- Designed the web and mobile interface proposals for Controlify Finanzas (cash closing, expenses, cash flow) and iCross (border-crossing app), plus iCross's 3D identity and brand book.
- Designed and built the Integrity Seguros website for an agency client: a bilingual, VIN-based insurance quote flow on a Next.js and Supabase API. Also delivered its 2026 brand book, a Q4 2026 marketing and content plan, video scripts and a custom Grok bot that generates its campaign photography.
- Run social media for Controlify (Instagram and Facebook) and ReclutaYa (Facebook), across organic content and paid campaigns.
- Produced sales collateral (pitch deck, product sheet, per-module carousels) and a weekly social media content calendar.
- Partner with the development team to turn technical features into clear customer messaging; interview candidates to grow the marketing team.

Corning Optical Communications (Corning Incorporated) Reynosa, Mexico · Jun 2018 – Jul 2025

Communications Auxiliary — Corporate Communications · Jun 2020 – Jul 2025

- Led visual and audiovisual content for internal and external communications: branding, photography, video, graphic design and digital campaigns.
- Covered corporate events and produced announcements and institutional materials for departments across the plant.
- Partnered with leaders, HR, operations and employee groups on culture, quality, sustainability, inclusion, innovation and recognition campaigns.
- Drove digital transformation initiatives within corporate communications.

Human Resources / Recruitment · Jun 2018 – Jun 2019

- Managed recruiting and hiring processes for the plant.
